SUMMARY

Full-stack web developer with 3+ years of experience building Laravel backends, token-based REST APIs and Next.js / Ionic React frontends for multi-role platforms. Delivered products across e-commerce, real estate, matrimony, MLM, medical imaging, music publishing, and business and charity platforms. Hands-on with payment gateway and third-party API integration, role-based access control, database optimization and VPS deployment.

PROFESSIONAL EXPERIENCE

Web Developer

Aug 2024 – Present

Aarnatech Xperts Solutions, Lucknow, India

- Develop and optimize Laravel backend modules, improving maintainability and reducing feature turnaround time.
- Design and build secure, well-documented token-based REST APIs in Laravel, consumed by mobile and web applications.
- Improve database query performance and redesign schemas to scale under growing user load.
- Manage VPS and server setup, deployments and code versioning through Git, GitHub and Bitbucket.
- Integrate payment gateways and third-party APIs across client platforms.

Web Developer

Jun 2022 – May 2023

Lookupit Solutions Pvt. Ltd., Lucknow, India

- Built admin dashboards, custom CRM features and workflow automation modules to streamline internal operations.
- Implemented authentication and role-based access control (RBAC) across multiple client applications.
- Managed end-to-end deployment, bug fixing and performance optimization for production systems.

Junior Web Developer

Dec 2021 – Mar 2022

Nevina Infotech Pvt. Ltd., Lucknow, India

- Assisted in backend development and API creation using PHP and Laravel.
- Fixed bugs, improved UI functionality and took part in peer code reviews.
- Gained foundational experience with MVC architecture and professional coding standards.

KEY ACHIEVEMENTS

- Cut feature turnaround time by **30%** through optimized backend development.
- Improved database query performance by **40%**, making the system more responsive.
- Developed **10** secure REST APIs for cross-platform (web and mobile) use.
- Built backend systems for a platform with **5k+** monthly active users.
